### **With high quality from YoLong**

The world's premium beers age in tanks from Yolong. We are able to manufacture one-piece, cylindroconical fermentation and storage tanks with a diameter up to 7.5m. Tanks larger in diameter and those too big to transport in one piece are assembled at the installation site from components pre-fabricated at the factory.

#### **Fermentation and storage tanks**

Through state-of-the-art production methods, the fermentation and storage tanks from Yolong feature particularly smooth surfaces.

Thus, Yolong sets standards in the industry, which even exceed the common requirements of international industrial standards.

Yolong tanks ensure a more reliable quality maintenance of the stored product and require less cleaning. In conjunction with the Yolong Hygienic Design, maximum biological safety is guaranteed. In addition to fermentation and storage tanks, Yolong provides its customers with the entire range of vessels for the brewing process. The tanks and vessels are manufactured with the highest precision and are specially designed to meet the requirements of each individual project.

### Bright beer tanks

In addition to fermentation and storage tanks, we also offer bright beer tanks for all requirements and in all sizes.

### Yeast tanks

The yeast cellar is a sensitive area. Our electropolished tanks with particularly smooth surfaces ensure a very gentle storage of the yeast as well as an optimal yeast regeneration and propagation.

### Water tanks

Moreover, we also provide our customers with unpressurized water tanks in various sizes for the different areas of the beverage industry. These tanks are manufactured according to the your specific requirements and adapted to your needs.

### Horizontal tanks

In addition to vertical, cylindroconical fermentation and storage tanks, horizontal tanks are requested as well. We manufacture these tanks with the highest precision, based on our customer's needs and requirements.
